Diesel Engine

- Model: **4BTAA3.9-G3**
- Structure: Using forged steel camshaft and crankshaft, high-strength cylinder design, many parts are cast on the cylinder, with high rigidity, strong high-pressure resistance and longer service life;
- Integrated design: the cylinder block, cylinder head and other parts are "multi-purpose in one piece", reducing the number of connecting parts; 40% fewer parts than other similar engines, greatly reducing the failure rate .
- Advanced design and sophisticated manufacturing: adaptable to harsh working conditions and strong in high-intensity and heavy-load operation capabilities;
- Fuel system: The rotor high-pressure fuel pump consumes less fuel and effectively reduces noise.
- Lubrication system: The cylinder liner with platform texture honing design has a perfect geometric structure to effectively prevent oil leak;

Alternator

- Optional brands: **Stamford / Marathon / Faraday / Engga / Mecc Alt**
- Brushless, 4 pole rotating magnetic field, single bearing with protective cover.
- Insulation: H Class.
