## **Diesel Engine**

■ Model: 1106A-70TAG

- Building upon Perkins proven reputation within the power generation industry, the 1100 Series range of ElectropaK engines now fit even closer to customers needs;
- In the world of power generation success is only gained by providing more for less. With the 1106A-70TAG Perkins has engineered even higher levels of reliability, yet lowered the cost of ownership;
- 1100A units are designed for territories that do not require compliance to EPA or EU emissions legislation. These engines are assembled around optimal, efficient manufacturing processes with state-of-the-art technology. They are built to provide the exact power solution for customers who sell their applications into lesser regulated countries;

- Focusing on our common platform theme, changes to engine envelope dimensions and connection points have been kept to a minimum;
- The Perkins® 1106A-70TAG delivers up to 200 kVA standby at 50 Hz and 175 kWe at 60 Hz, providing greater productivity through an improved power to weight ratio;
- This world-class power density has been achieved in a 7 litre engine, using a mechanical fuel injection system; making this engine robust for all markets, with the ability to cope with the variation of fuel qualities around the world The 1106A has been designed for excellent load acceptance to ensure your facility is powered quickly at all conditions;
- Service intervals are set at 500 hours as standard;
